## ERRATA

P. 1432. Under "TURKEY," 2d paragraph, 3d line, sentence beginning "On the other hand, well No. 2 on the Garzan structure . . . (4,050 feet)," should be completed as follows: "during June and discovered the second oil field of Turkey. The oil from Garzan is also from the Upper Cretaceous limestone like that of Raman but is of better quality (26° Be.) than that of Raman oil with comparable productivity. The third well on the Garzan structure was at a depth of 524 meters at the end of the year, drilling in the Germav shales. At Kentalan, the structure still farther east, well No. 2 was stopped at 1,500 meters near the Jurassic-Triassic contact."

P. 1652, 4th paragraph, last line. "350" should be 1,450.
